Dear Valued Customer,

Effective August 1st, 2014, Arnthane Inc. will increase the price of our ThermalGuard Spray Foam Insulation & WaterShed Spray Foam Roofing products by 3%.

Raw material prices have increased significantly due to increased global demand for products like our ThermalGuard & WaterShed spray polyurethane foams and coatings and demand is expected to remain high for the foreseeable future.

Unfortunately, this price increase is necessary to offset these rising costs. We appreciate your business and look forward providing you with the same excellent service and industry-leading insulation and roofing foams and coatings.

Please let us know if you have any questions or concerns and, as always, we very much appreciate your business.

Kind Regards,

Matthew R. Hugg
National Sales Manager
Arnthane Inc.
